RINSING AND DISINFECTION SYSTEMS

**DISINFECTION
SPRAY SYSTEMS**

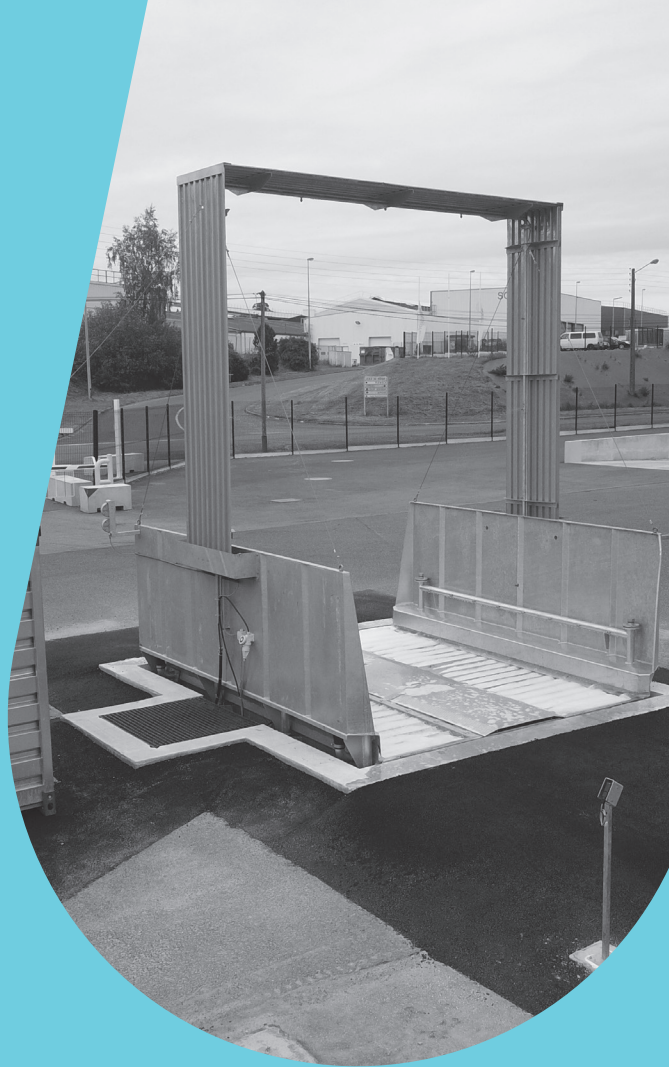

DISINFECTION ULTRA SPRAY SYSTEMS (DUS)

These systems consist of a decontamination arch combined with a mobile or static wheel wash and decontamination system.

This complete and permanent solution allows even the trickiest places to be thoroughly disinfected.

BENEFITS:

- Thorough disinfection of places that are difficult to access
- Internal water recuperation
- Mobile or static systems
- Simple to control and maintain
- Can be customised to your requirements
- Hot dip galvanised wash platform

DISINFECTION ULTRA SPRAY MF

- Thorough cleaning
- Manual sludge discharge
- Water recuperation
- Mobile mounting system
- Optimum dirt separation (++)
- Up to 40 vehicles/hour
- Water reservoir – 5 m³
- Pump capacity – 1,600 l/min
- Automatic dosing of flocculation agent
- For lorries

DISINFECTION ULTRA SPRAY IC

- Thorough disinfection
- Automatic sludge discharge
- Water recuperation
- Static and fully-integrated system
- Extreme dirt separation (+++)
- 50 to 90 vehicles/hour
- Water reservoir – 12-22 m³
- Pump capacity – 3,200-6,400 l/min
- Automatic dosing of flocculation agent
- For lorries and tractors

DISINFECTION SPRAY CUSTOM BUILT

- Custom built
- Heavy-duty vehicles
- Specific load or cleaning

OPTIONS:

- Drive-over matting
- Winter package
- Heavy-duty pumps
- Bidirectional traffic

DISINFECTION SIMPLE SPRAY SYSTEM (DSS)

This decontamination arch is a permanent solution for preventing and curtailing diseases on the site.

The spray arch is activated by a signalling hose once a vehicle drives onto the site.

BENEFITS:

- Disinfection of the exterior of the vehicle
- Simple to install and maintain
- Automatic operation

SIMPLE SPRAY (DSS)

- Disinfection of the sides, top and underside of the vehicle
- Spraying time according to the length of the vehicle
- Fully-integrated metal detection loop
- 11 nozzles in the arc and 6 nozzles in the drive-over plates (lower side)
- Nozzles with non-return valve (prevents drainage of the arc)
- Mobile system
- 40 vehicles/hour
- For lorries and tractors
- Stainless steel casing for controls and pump
- Reinforced structure
- Galvanised ramp profiles

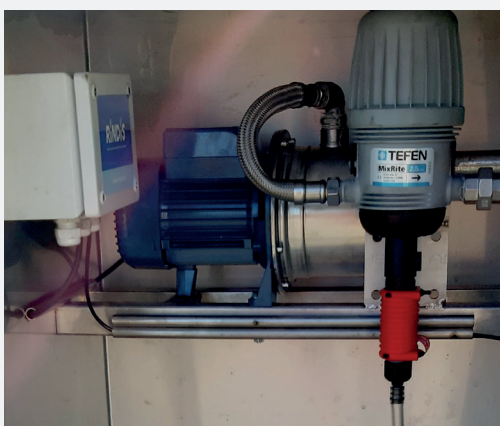

OPTIONS:

- Bidirectional traffic
- Dosing
- Cubitainer
- Pressure detection loop for mounting

DISINFECTION SIMPLE DRIVE-THRU (DSD)

This drive-thru/disinfection tank is a permanent or temporary solution for preventing and combatting diseases on the site.

- Disinfection of the wheel profile through a full wheel revolution
- Mounting system
- Simple to install and maintain
- Mobile system
- 40 vehicles/hour
- Dirt falls through the honeycomb structure
- Galvanised

Stop diseases and dirt!
Prevent them from entering
or leaving your site!

A disinfection system is used on the **exterior of the entire vehicle** and can also be combined with a wash and disinfection system for tyres.

WHY CHOOSE RINDIS?

Fast response

Offers high-quality products

Reliable

Adapts systems to your needs
