RINSING AND DISINFECTION SYSTEMS

**TYRE  
DISINFECTION  
SYSTEM**

## TYRE DISINFECTION (TD) SYSTEM

This sprinkler system is the ideal solution for preventing cross-contamination between sites and farmyards.

This is because you can decide where and when you decontaminate the tyres.

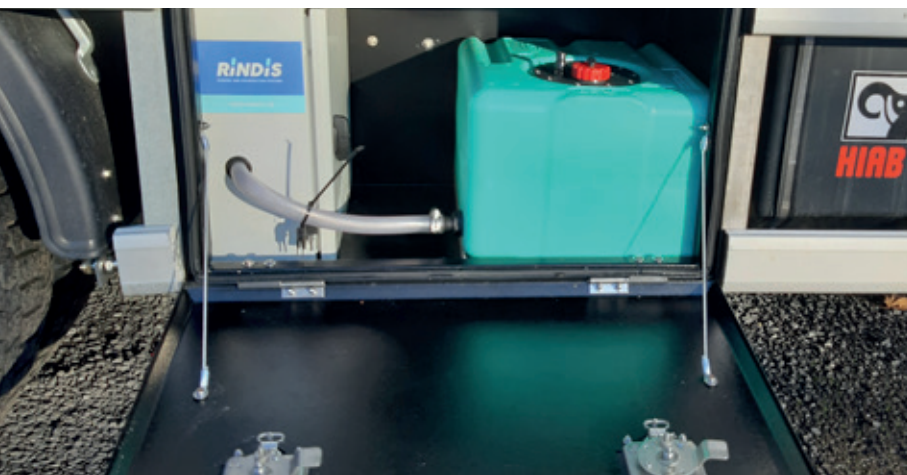

The system is mounted to the vehicle and is simple to activate from inside the lorry. It disinfects or decontaminates wheels as they rotate which saves the driver time!

### BENEFITS:

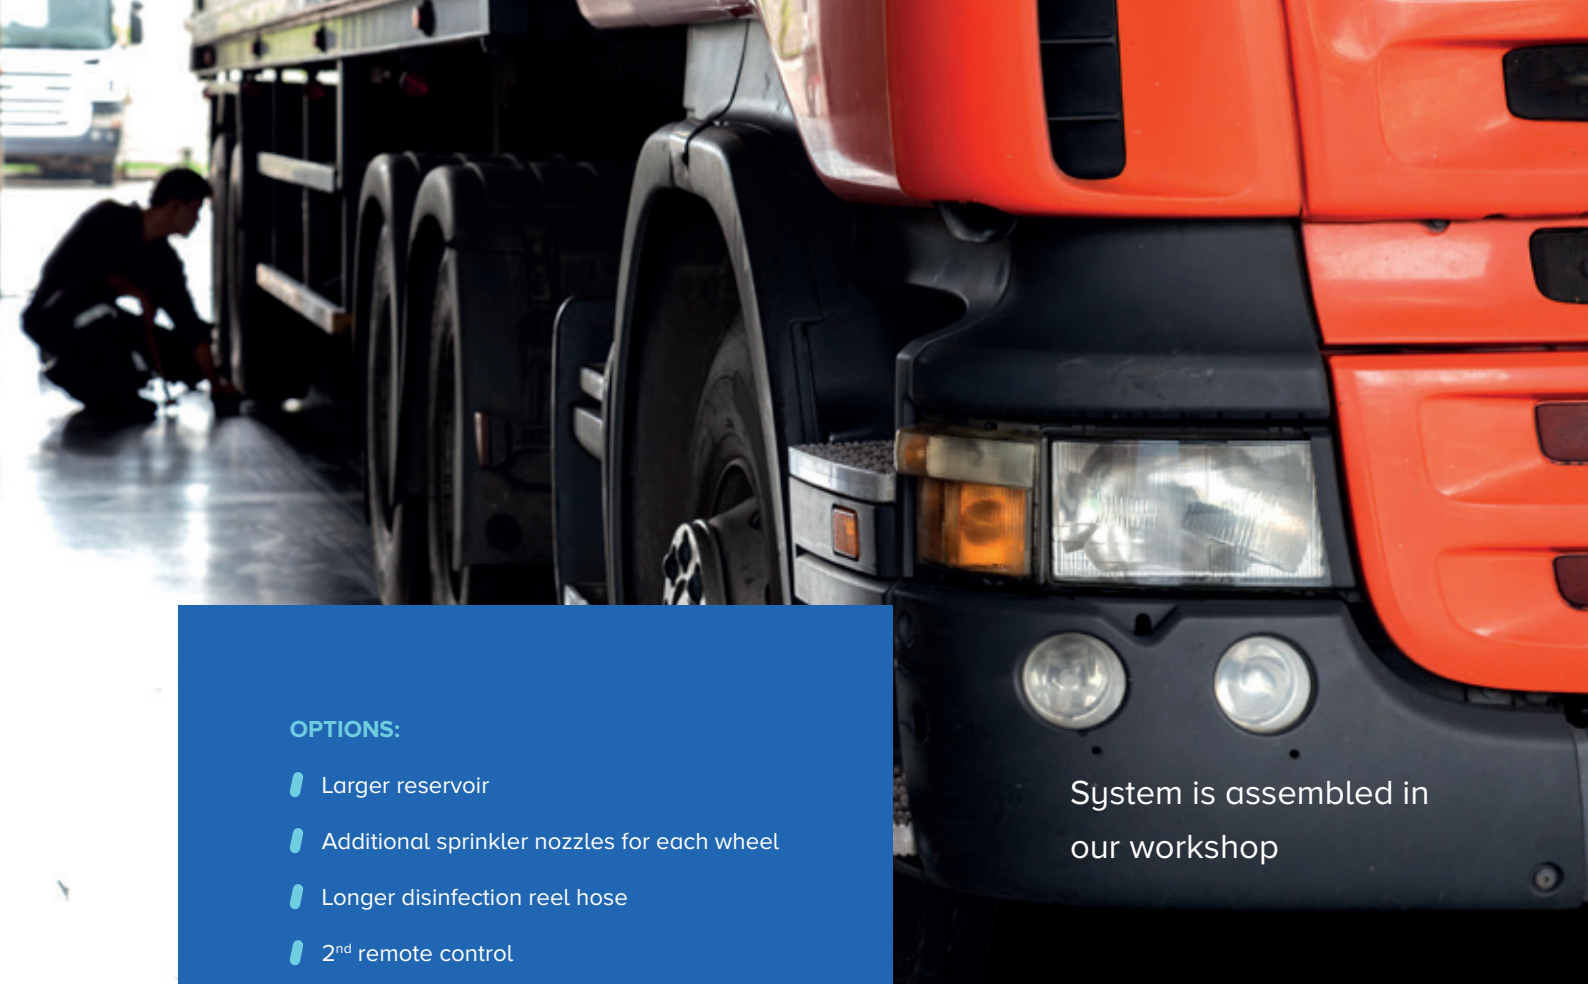

- ▮ Cleans areas that are difficult to access as you drive
- ▮ Disinfection of profile and inner and outer areas of the tyre.
- ▮ Compact and high performance
- ▮ Automatic control

- ▮ Simple maintenance
- ▮ Can be customised to your requirements
- ▮ 2 sprinkler nozzles for each tyre
- ▮ Controlled remotely from or around the lorry
- ▮ 8 m decontamination hose for manual decontamination
- ▮ Can be used on different types of vehicles
- ▮ High performance pump that can run dry

**OPTIONS:**

- ▮ Larger reservoir
- ▮ Additional sprinkler nozzles for each wheel
- ▮ Longer disinfection reel hose
- ▮ 2<sup>nd</sup> remote control
- ▮ Tubular spray lines
- ▮ Lorry cabinet

System is assembled in  
our workshop

**Stop diseases!**  
Prevent them from  
entering or leaving  
your site!
